

ADRIAM FRANCENY ARISTIZABAL LARA

Data Scientist | Analytics & Business Intelligence

Barranquilla, Colombia | 3016398214 | Adriamaristizabal@gmail.com | linkedin.com/in/adriam-aristizabal225b82191

PROFESSIONAL SUMMARY

Data Scientist graduated from Universidad del Norte, with hands-on experience in web analytics, business intelligence, and machine learning within real corporate environments. During my professional internship at Promigas S.A. E.S.P., I designed data pipelines and executive dashboards (BigQuery, Looker Studio, Power BI, Databricks) that supported marketing and digital growth decisions. I combine solid statistics and machine learning foundations (Python, R, Scikit-learn, TensorFlow) with the ability to translate complex data into clear, actionable reports for both technical and non-technical audiences.

TECHNICAL SKILLS

Languages & Libraries: Python, R, SQL, Scikit-learn, TensorFlow, Pandas
Analytics & BI: BigQuery, Looker Studio (Google Data Studio), Power BI (DAX, Deneb/Vega-Lite), Databricks
Tools & Platforms: Git, GitHub, Docker, PostgreSQL, Jupyter Notebooks, Dash, Plotly
Methodologies: Time-based validation, statistical process control, class balancing (SMOTE), reproducible end-to-end pipelines
Competencies: Critical thinking, teamwork, positive attitude, effective communication, self-directed learning, attention to detail
Languages: Spanish (native), English (advanced)

PROFESSIONAL EXPERIENCE

Promigas S.A. E.S.P.	<i>Barranquilla, Colombia</i>
<i>Intern — Marketing & Growth 03/2026 – 08/2026</i>	
- Designed and maintained executive dashboards in Looker Studio and Power BI on BigQuery data to track conversion funnels for digital products, supporting marketing and growth decisions. - Built data pipelines in Databricks and SQL to clean, enrich, and recover web analytics data, ensuring continuity of executive reporting. - Applied predictive models and statistical process control (Python) to monitor drop-off rates across digital funnels, prioritizing early alerts on critical business metrics. - Developed custom Power BI visualizations (DAX, Deneb/Vega-Lite) for period-over-period performance comparisons. - Produced technical documentation and executive presentations for non-technical stakeholders across business areas.	

ACADEMIC PROJECTS

Spatiotemporal Prediction of Traffic Accident Severity	<i>2025</i>
- Built a binary classification model on the US-Accidents dataset (7.7M+ records), comparing Random Forest, XGBoost, and logistic regression. - Developed a complete pipeline with spatiotemporal validation and class balancing (SMOTE), achieving significant improvements in F1-score and AUC over initial benchmarks.	
Major Depressive Disorder Prediction from EEG Readings	<i>2025</i>
Designed machine learning and deep learning classification models for Major Depressive Disorder (MDD) using EEG readings from 53 individuals, prioritizing statistical analysis and rigorous validation in a clinical context.	

EDUCATION

B.S. in Data Science	<i>2022 – [09/25/2026]</i>
<i>Universidad del Norte</i>	
Bilingual Technical High School Diploma	<i>11/2021</i>
<i>IEDTB Jorge Nicolás Abello</i>	
Technician in Telecommunications Network Installation and Maintenance	<i>11/2021</i>
<i>Institución Universitaria de Barranquilla (IUB)</i>	

AWARDS & LEADERSHIP

- Full tuition Scholarship: Talento Promigas (06/2022).
- Secretary, IEEE CIS Chapter Board (07/2025) — managed activity reports and event logistics.
- Communications Deputy Director, Bourbaki Student Board (01/2025) — led promotional audiovisual content creation for the student group.
- Volunteering: English teacher at Scribble Beyond Education (Univoluntarios, two semesters); event staff at the Under-16 Chess World Championship, BarranqIA 2025-1 Hackathon, Vive Uninorte 2025-1 Fair, and Universidad del Norte 2025-1 Induction.
